

VIII. Conclusion: Pollution Prevention for Healthcare Facilities

Healthcare facilities in New Hampshire and across the country are already using pollution prevention techniques to reduce the toxicity, volume and disposal costs of their wastes, reduce their mercury and dioxin emissions, and lower their liability. We hope that using this guide will further healthcare facility's efforts to prevent pollution. For more information please contact Sara Johnson of NHDES at 1-800-273-9469 or sjohnson@des.state.nh.us or Debbie Augustine of the Foundation for Healthy Communities at 603-225-0900 or daugustine@nhha.org.
